Private Sector - Environment Care

Smart(er) IT Application for German Green Dot Company developed by Dmax IT R&D Team ...in record time!

In 2007 Dmax secured a challenging IT development project with a leading German provider of logistics and return systems for the pharmaceutical Industry, part of the environmental European Green-dot system of Germany.

The system required entailed a detailed analysis, held in Germany by Dmax IT Analysts, the software development phase that envisaged the creation of stand alone solution to translate data electronically received into data usable for the ERP (enterprise resource planning) system (BaaN IV).

The subsequent steps of this project entailed:

- The connection of the system in real time with BaaN
- To develop our system into the main front-end used by all internal users
- To implement all future functionalities not in the ERP system but in our newly created innovative system
- To roll our system out to other subsidiaries
- To migrate to BaaN VI with all functionalities

In this project Dmax works in close co-operation with Inobis consulting group, which is highly specialist consulting group focusing on implementing BaaN and SAP in large companies.

Inobis was asked identify a good and reliable software development partner with very good analytical skills, and they went for Dmax, and judging by their repeat orders, it seems they are quite satisfied with their choice.

Dmax Malta can be contacted on phone 00356347990 or via e-mail ceo@dmax.tv
